

Dear Stakeholders,

As per my previous email Parks have met with consents and engaged a consultant to undertake a variation to the existing resource consent to allow works to be undertaken during the summer period if required. The variation is currently being processed by Council. A final decision is expected by the end of February.

Dune profile surveying was undertaken in January and the profiles have been overlaid with the profiles taken last year. Please find attached the profiles as well as specialist interpretation on this data.

At the meeting in December it was agreed that another meeting should be held in May 2012 when more survey information was available. However due to the recent erosion and advise from internal specialists I will be arranging a meeting in late February to discuss the surveys, determine if trigger points can be confirmed and therefore works occur this summer. A separate meeting invitation will be sent out for this.

Kind regards,

Tracey Hodder | Parks Advisor - Development
